"The first time I used a hypermotion-enabled player, I was amazed by how natural the feeling felt," says FIFA 22 development director Matt Prior. "The impact of these new technologies really captures the intensity of the game. We've taken this natural feeling and added even more, from the on-ball action, to the tackles and aerial duels to create the most authentic and realistic football ever in a video game." Additionally, the detail and polish of FIFA 20 has been elevated, and it's about to get better. "This is the most detailed, polished FIFA to date. It's packed with added features, improved graphics, improved lighting, and is all powered by a new soundtrack created by the creative genius of world-famous film composer Hans Zimmer. We really listened to all the feedback from fans and players, and to make this the best-looking and best-feeling FIFA game ever, we're introducing major improvements across the board," adds Prior. "FIFA 20's biggest game-changers are improvements to AI and Defending. The AI - especially the Goalkeepers - will get smarter, create smarter challenges, and keep on creating chances even if the pressure is on." FIFA 20 introduces a new Defending system, where AI-controlled team mates intelligently combine to defend and attack, and react in and around the box. AI of central defenders is also improved, anticipating moving forwards or backwards, making runs into position, and helping to keep an eye on the goal. "It's been a long time coming, but we really believe in this concept," says Prior. "With Defending, you don't need to focus on your team mates. What makes FIFA unique is the fact that your team mates will do this for you - creating 1v1 challenges, moving into the box, and combining to create attacking opportunities." Those who have played FIFA 19 will get all these features in FIFA 20 with all-new controls. "All the new controls in FIFA 20 have been designed with completely new ideas and with the user in mind," adds Prior. "The new D-pad design is comfortable for one-handed movement, and the new sprint, pass, shoot, and dive controls feel great." F

What's new:

- **Variety of new FUT game modes designed for FIFA Ultimate Team.** FUT will be enhanced to include a new Pick The Team, League and Hit The Net mode. Pick The Team (PTT) mode will give players the ability to build their dream team from their favourite international legends from the past, present, and future from the ESPN-branded "FUT Team of the Week". The FUT League mode will provide players with tournament-style competition, round-robin, head-to-head, or knockout formats. The Hit The Net mode will allow players to test their luck in a special game type that features the net as a rebound zone, and each goal is a goal scored. All of these modes have previously been available in the Ultimate Team and Ultimate Team Seasons modes, but the addition of these game modes to FUT, along with the presentation of them in a significantly more dynamic interface, is a bold new direction for the mode.
- **New immersive Club environments designed for FIFA** - FUT will include new locations that add a different look and feel to the mode. FIFA 22 includes several club environments from countries around the world, featuring local music, performance and celebration animations, authentic kits, and community-requested cues, to make players feel like they are a true member of the club wherever they are playing. Every club is decorated by iconic elements from the community as well!
- **New star player models:** 5 of the world's biggest stars are featured in the new head models of the FIFA 22 roster, all with improved textures and animations and at resolutions at least 300% that of previous generation versions.
- **Personalized player faces based on unique portraits drawn by fans:** The majority of the playable characters in FIFA 22 have undergone several changes to their appearance based on the feedback received from the fans. Additional facial details and creases are now visible when players run with their new face.
- **New audio designed specifically for FIFA using music from the spheres of Psychedelic trance, House and Techno.** The ambient soundtrack in the game has been completely replaced to enhance player immersion and open up a new, modern, and exciting listening experience. Inspired by the beautiful sounds of physics, these new sound effects make the exact sensation of shooting
