The book has the most accurate and reliable computerized mathematics. Application of 3-Dimensional Measurement of Carotid Artery Intima-Media Thickness. The application of 3-Dimensional Measurement of Carotid Artery Intima-Media Thickness (3-D-MIMT) method is proposed for the detection of atherosclerosis. The aims of this study were to (1) evaluate the performance of 3-D-MIMT in detection of atherosclerosis, (2) examine its clinical utility in current practice of medicine, and (3) compare 3-D-MIMT with conventional carotid intima-media thickness (IMT) method. From September 2015 to November 2016, IMT was performed on 647 patients. The max, mean, and minimal IMTs of the right and left common carotid artery were measured. The 3-D-MIMT of the distal segment of common carotid artery was assessed by a different person than for the conventional IMT method. On its own, 3-D-MIMT method showed a sensitivity of 100%, a specificity of 99.1%, a positive predictive value of 80%, a negative predictive value of 100%, a diagnostic accuracy of 99.1%, a concordance index of 0.923, and an area under the curve of 0.842 in the detection of atherosclerosis. However, the conventional M c6a93da74d
